-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 4, 5, 12-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the response filed Feb. 27, 2004.

The disclosure is objected to because of the following informalities: On page 9, line 11, "1 and 2" should be "7 and 8". Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 3, 7-9, 11, 17, 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 2, line 2, there is no antecedent basis for "said balloon". In claim 3, line 3 is confusing and inaccurate since "first sleeve" should be "second sleeve". The outer shaft defined in claim 7 is part of the catheter defined in claim 1. Thus, "further comprising" in claim 7, line 1 is confusing and inaccurate. In claim 20, line 4 indicates that expansion of the ends of the stent are

Art Unit: 3731

delayed. However, lines 6-7 indicate that an overall uniform expansion of the stent is provided, contradicting line 4.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, 6-11, 16-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ryan (EPO 0442657). Ryan, in the configuration shown in figure 7B, shows catheter 10 comprising an expandable distal portion 20, stent 24, first sleeve 26 having a second end abutting the first end of the stent. Alternatively, it would have been obvious that the second end abuts the first end of the stent since figure 7B shows no space between these members and since the sleeve 26 is resilient such that as the stent expands,

Art Unit: 3731

the sleeve 26 would press against the end of the stent at least momentarily. As to claim 7, Ryan discloses inner and outer shafts in the embodiment having coaxial lumens described in col. 6, lines 19-21. As to claims 8 and 9 note col. 6, lines 48-50 of Ryan. As to claim 10, Ryan discloses an annular region of increased thickness in the embodiment of figures 11A and 11B at the right end of figure 11A. As to claims 18 and 19, the sleeves 26, 28 do not overlap the ends of the stent when the catheter is in the configuration shown in figure 7B.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Thaler whose telephone number is (703) 308-2981. The examiner can normally be reached Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J. Milano can be reached on (703)308-2496. The fax phone number for the organization where this application or proceeding is assigned is (703)872-9306.
